

FORENSIC EMAIL COMPLIANCE

It's always been good practice to keep records for a considerable time. Now it's essential. A fully auditable, forensically compliant copy of all individual emails needs to be available to meet the legal and regulatory requirements in social housing. This has the potential to be an expensive and time consuming process, but with Cryoserver it's simple.

BENEFITS

Cryoserver provides permanent delete-proof archive of all emails with easy search and retrieval.

COMPLIANCE AND PROTECTION ACROSS ALL DEPARTMENTS

Above all else, Cryoserver complies with today's email retention requirements. It provides a permanent and delete-proof archive of all your organisation's email correspondence and it allows for the quick and easy search and retrieval of emails.

- Speeds up email investigations while increasing employees privacy and confidentiality
- Decreases liability and increases productivity by making users think twice before they press send
- Provides forensic evidence for court actions
- Preserves knowledge in the organisation in a secure, searchable repository
- Delivers significant cost savings

As a compliance solution, Cryoserver has benefits for every department within an organisation:

IT - Saves time and simplifies email retrieval

HR - Enforces email policies while maintaining the individual's right to privacy. Email evidence can be used in tribunals and disciplinary proceedings.

Customer service and procurement - Quickly and accurately determines what commitments have been previously made with customers.

Accounting - Ensures all explanatory supporting records for financial transactions are held for the legally required period.

Legal - Allows email to be used as evidence in court, defensively and offensively.

TICKING ALL THE BOXES

As the world leader in forensic email compliance solutions, Cryoserver ticks all the boxes for social housing requirements.

Provides complete records:

- Captures a copy of every email.
- Content of emails and attachments is indexed prior to storage.

Comprehensive audit trail:

- Privileged and administrator level access to the system is audited using a transcript of their session.

Secure solution:

- All access to the system is recorded and retained securely.
- Emails are stored with a timestamp, sequential folio number and digital fingerprint.
- Access to the system is through a secure web interface.
- All traffic passing between the modules is SSL encrypted.
- Emails can be forwarded in real-time to a secondary storage location.
- Email data is compressed before storage.

Maximum flexibility:

- Compatible with current mail servers: Microsoft Exchange, Novell Groupwise, Lotus Notes, Sun JES and Teamware.
- Modular system design.
- Architecture.

Fast email retrieval:

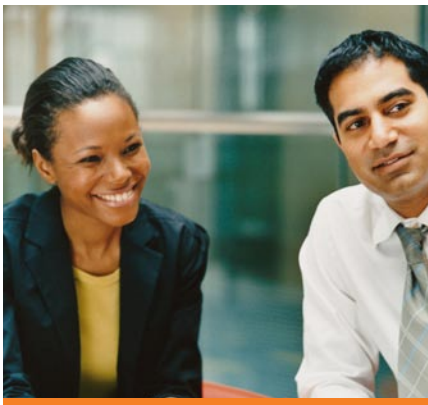

- Browser based user interfaces.
- Simple search on content and metadata.
- Advanced search using stemming, sound-alike and proximity.

Scalable:

- Storage and indexing capacity can be added.
- Distributed architecture.
- LDAP/Active Directory Support.

"Cryoserver is working very well for us. It does everything we need for best practice and compliance, and more. In the IT Department, it has given us the peace of mind that all emails are stored and, should we need to retrieve them, it's a very simple and quick process. It also means that other staff are content that no one can access their emails without good reason and even then, it's traced."

Ian Lee, IT Manager, Weaver Vale Housing Trust
